Record Number Eligible To Vote On June 19

When it comes to voting, the people of the Greater Vancouver area are showing a record interest in the upcoming election on June 19. The number of people eligible to vote in the area is estimated to be the highest in the history of the province.

The reason for this is the large number of new residents who have moved to the area in recent years. Many of these people are young families who are looking for a better place to live. They are also looking for a better place to vote.

The Greater Vancouver Board of Elections is pleased to see this increase in interest. They are working to make the voting process as easy as possible for all eligible voters.

The Services Men Reader

It is a common practice with the courts to allow the parties to the marriage to make their own arrangements for the support of the children. In the case of *Ward v. Ward*, 1990, 11 F.T.R. 208, 1990 FC 100, the court found that the husband's failure to provide for the children was a breach of his duty of support. The court also found that the husband's failure to provide for the children was a breach of his duty of support.

Blanch Vegetables Before Freezing

It is important to blanch vegetables before freezing them. Blanching kills the enzymes that cause vegetables to lose their color and flavor when frozen. It also helps to preserve the texture and nutrients of the vegetables.

To blanch vegetables, first wash them thoroughly. Then, bring a pot of water to a boil. Add the vegetables and cook for a few minutes. Drain them well and then freeze them in airtight containers.

Questions And Answers

ON THE Alberta Liquor Plebiscite

1. WILL THIS PROVINCIAL PLEBISCITE CLOSE ANY OF THE PRESENT OUTLETS?
No. The plebiscite will decide only whether or not the people want additional types of outlets.
2. WHAT ARE ADDITIONAL TYPES OF OUTLETS?
Additional types of outlets may be sale of alcoholic beverages in unlicensed bars, dining rooms, restaurants, grocery stores, and on trains and planes.
3. HAVE THESE ADDITIONAL TYPES OF OUTLETS BEEN TRIED IN OTHER PROVINCES?
Yes — during the last ten years in Ontario, and more recently in British Columbia. In both these provinces there has been a marked increase in the consumption of alcoholic beverages with the introduction of additional outlets. In Ontario, for example, during the past decade there has been an increase of 17% in alcoholism, according to the Ontario Alcoholism Research Foundation.
4. IF ALCOHOLIC BEVERAGES WERE MORE ACCESSIBLE THROUGH A GREATER NUMBER OF OUTLETS WOULD PEOPLE DRINK MORE MODERATELY?
The more outlets there are the greater the consumption of alcoholic beverages. From the last legal restriction of any country in the world to the highest rate of beer consumption in 1964 the number of beer licenses in force was 971. In 1965 the number of beer licenses was 1,012. Consumption of beer that year was \$255.88 million, an increase of \$17.75 million, or 7.3%.
5. WHAT IS THE CITIZENS' PLEBISCITE ORGANIZATION?
The Citizens' Plebiscite Organization is a non-profit organization of Albertans who are taking the lead in support of the first recommendation of the Special Committee on the Liquor Act that no new types of outlets be permitted.
6. HOW MAY I JOIN THE CITIZENS' PLEBISCITE ORGANIZATION?
Simply by registering with your local Citizens' Plebiscite Organization. They will send you a booklet and a list of names of other citizens who have joined.
7. THE PLEBISCITE IS SUBJECT TO A LOCAL OPTION VOTE. WHAT DOES THIS MEAN?
This means that should the Plebiscite voting be in favour of additional types of outlets, each municipality could be asked if it would be necessary for the citizens of that community to decide whether or not they favour any of the additional types of outlets by a local option vote.
8. WHAT IS THE DATE FOR THE PLEBISCITE?
Preliminary date recommended by the Government is Wednesday, October 15, 1970.

Fatigue in Children Can Be Serious

When a child is tired, it can be a sign of a more serious problem. Fatigue in children can be caused by a variety of factors, including lack of sleep, poor nutrition, and underlying medical conditions. It is important for parents to pay attention to their child's behavior and to seek medical advice if they are concerned. A doctor can help to determine the cause of the fatigue and to recommend appropriate treatment. In some cases, fatigue may be a sign of a chronic condition, such as anemia or a thyroid problem. It is important to catch these problems early and to get them treated.

Chapman, assistant of the health department, has suggested that the city of Saskatoon should abolish the property improvement tax. He said that the tax is a burden on the property owner and that it is not a fair way of raising money for the city. He suggested that the city should raise money in other ways, such as by increasing the tax on businesses or by raising the tax on the use of land.

Disastrous Year In Auto Insurance

The year 1957 has been a disastrous year for auto insurance. The cost of repairs has increased significantly, and the number of accidents has risen. This has led to a sharp increase in the cost of insurance for drivers. Many drivers are now finding it difficult to afford the high premiums. The insurance industry is facing a crisis, and many are calling for government intervention to help stabilize the market.

Christmas Story

“And suddenly there was with the angel a multitude of the heavenly host praising God, and saying, Glory to God in the highest, and on earth peace, good will toward men.”

So the Holy Book tells us of shepherds who watched by night, and of One who came to earth with a glorious message, with hope and joy for all mankind.

It is our sincerest wish that the wonder of the Christmas story bring to you spiritual values to cherish now and forevermore.

Who Will Improve The Schools

Colby, Alberta
With all the talk there is about the need for improving the schools, it is interesting to note that the Colby School Board has not yet decided on a plan of action. The board has been in session for several months, but has not yet reached a decision. This is a pity, as the schools are in need of improvement, and the board has the power to make the necessary changes.

We note that Stettler Board of Trade has placed parking meters on the top of the signposts for the parking of January 20. We hope that it will prepare a traffic parking survey before the meeting as that the question may be debated with some intelligibility.

Both have a bank account - and a purpose for saving

The difference between reaching a goal and failing is that the one who fails does not have a bank account.

Bank savings don't just happen. They require some action, definite planning. But your dollar doesn't stop you from a goal of accumulation, of getting ahead, that makes the effort count more than the goal.

Your bank account provides you with the help you need to get ahead. It's a place where your money can grow, and it's a place where you can see the results of your saving.

Start a bank account today. It's the first step to a better future.

BRANDMA ALWAYS WASHED ON MONDAYS

Grandma used to have Mondays... for laundry was always wash day. It was such a big operation to wash all day, and the house would be full of hot steam and boiling clothes. Grandma loved Mondays. Mondays, she'd clean the house and the laundry... and the trouble she had trying to keep the house hot.

Today, with all the electrical appliances, you can wash, dry and iron in less than an hour. Grandma got the best of it. Grandma loved Mondays. Mondays, she'd clean the house and the laundry... and the trouble she had trying to keep the house hot.

Cigarette-Cancer Link Disputed

Dr. Robert A. Peto, Director of the Cancer Research Unit at the University of Oxford, has written a paper disputing the link between cigarette smoking and cancer. Dr. Peto's paper, which is published in the British Medical Journal, states that the evidence linking cigarette smoking and cancer is not as strong as it is often claimed to be. He points out that many people who smoke cigarettes do not get cancer, and that many people who do not smoke cigarettes do get cancer. He also points out that the evidence linking cigarette smoking and cancer is based on a study of people who have died of cancer, and that this study is not as reliable as it is often claimed to be. Dr. Peto's paper is a significant contribution to the debate on the link between cigarette smoking and cancer.

Know What You're Voting For

It is not too surprising to learn that half of the voters of Canada do not know anything for which the Liberals at the Conservative election campaign were even more ignorant about Western Canada and C, P, Inc. in Western Canada. 60 per cent of the people do not know anything about Social Credit. We cannot put much faith in this last figure as we saw more than 80% of the people in Alberta don't know what Social Credit is about.

54 per cent of the electors, who number something like nine million, are bachelors in the last election. There it would seem that the voters were being misled by any thought on the matter. There is indifference on the part of the indifference of the 2,200,000 who failed to turn up at the polls.

Confound it! I believe that just about all the men in this country are so ignorant that they are not even aware of the fact that the men of all parties are so ignorant of the things that are going on in the world of danger.

Here in our country we have four political parties, four great candidates, four great governments. I am sure that in a short time, the opportunities will be given to them to show their relations to the people and to the world in general and to the people in general.

There is a great deal of work to be done in the winter months, and the best time to do it is when the weather is cold and the ground is frozen. The best time to do it is when the weather is cold and the ground is frozen. The best time to do it is when the weather is cold and the ground is frozen.

His annual proposal of payment is a program of integrating all gas fields in the province with the export and domestic markets.

This would be done by building a vast, province-wide gathering system hooking all gas-producing areas. Such a system would go a long way toward smoothing out the province's biggest factor as gas prices.

It would eliminate the necessity of setting aside certain fields for export even when gas reserves would be considered as a single unit—anything less and more Alberta's gas would be available for export when desired.

Another suggestion under study is the possible establishment of a central gas marketing board, which would act as a common buyer and seller of gas at prices designed to protect the Alberta consumer and encourage industry.

Royalty Dividend Cut By Provincial Government

The provincial government has announced that it will cut the royalty dividend paid to the oil and gas industry. This decision has caused a great deal of controversy and has led to a number of protests. The government claims that the cut is necessary to reduce the provincial deficit, but the industry claims that it will lead to a loss of jobs and a decline in the economy.

The cut in the royalty dividend will affect the oil and gas industry in a number of ways. It will lead to a loss of revenue for the industry and will also lead to a loss of jobs. The industry claims that the cut is unfair and that it is a violation of the terms of the royalty agreement.

The government has defended its decision, claiming that it is necessary to reduce the provincial deficit. It claims that the cut is a temporary measure and that it will be able to pay the full dividend again in the future.

Are you using your settlement options?

At one time life insurance policyowners had no policy options. Policy proceeds were paid in cash - in one lump sum. Beneficiaries faced all the dangers and problems that go with managing a large sum of money.

Today most life insurance policies have "built-in" income options that will give your beneficiary a continuous income without investment worries. For example - you can arrange with your life insurance company to pay a monthly income for 10 years, 15 years or for a lifetime.

The Man from Manufacturers can show you how settlement options can increase your policy benefits as much as 25% without increasing your premium.

there are individuals in Canada who will work hard to develop the country's economic strength. They will develop the natural resources in many parts of Canada to permit the country to become a more self-sufficient nation. To raise capital for the ventures they must gain the confidence of millions of us who have no direct knowledge of the conditions of the economy, the political situation, the income tax situation, the health care situation, or the education situation. They are faced with the man who provides insurance protection in making investments. They are faced with the man who provides the capital for the business and the man who provides the money for policy holders. Canada and both are becoming more and more dependent on the man who provides the insurance. To become a more self-sufficient nation, we must have a rule we do not realize the importance of. We must have a rule of self-sufficiency and it is not too late to take advantage of it.

What has time done to your life insurance?
Everyone knows what can happen to the performance of a car that isn't serviced regularly. The same risk of "your performance" holds true for your life insurance. If you neglect to keep it up to date, time brings changes in your life that can cause the need for a review of your policy. Perhaps your beneficiaries should be reapportioned. Perhaps the method by which benefits are to be paid, either by income or by single sum, is no longer to your family's best interest. What would a careful review of your policy amount to? That you have seen the man from Manufacturers Life who can review your life insurance is arranged to do the job you need to do. Why not call him for a policy "check-up" today?

A black and white illustration of a cowboy riding a bucking horse. The horse is in a dynamic, rearing position, with its front legs tucked up and its hind legs kicking out. The cowboy is leaning back, holding the reins, and his hat is flying off. The illustration is done in a bold, expressive style with thick black lines and white space.
